

Environmental Policy Statement

Halton Foodservice Limited is a UK wide organisation working in the manufacture, supply and installation of ventilation equipment for the commercial catering industry.

We believe that our business is responsible for achieving good environmental practice and operating in a sustainable manner. We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to:

- Wholly support and comply with the requirements of current environmental legislation and codes of practice.
- Minimise our waste, reuse or recycle as much of it as possible.
- Separate hazardous materials from our waste streams and then dispose of them using specialist services to prevent damage to the environment.
- Minimise energy usage in our buildings, operations and processes in order to conserve supplies and minimise our consumption of natural resources, especially where they are non-renewable.
- Apply the principles of continuous improvement in respect of our operations and products.
- Prevent pollution and reduce impact from our operations, on the environment and local community.
- As far as possible purchase products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.
- Ensure that all employees understand our environmental policy and conform to the high standards it requires.
- Review our Environmental Policy and Environmental Management System to measure performance against objectives and targets.

Mr P Gibson (Managing Director)
