

USE OF COOKIES

A “Cookie” is a commonly used small text file that the internet browser installs on your computer or other device when you visit a website. The browser sends information on your visit back to the website when you revisit it. All contemporary websites use cookies in order to offer you a more personal browsing experience.

Each cookie is separately installed on each device you use and cookies can be read only by the server that installed the cookie. Because the cookie is bound to the browser, and is not distributable between separate browsers or devices in general (unless a browser, plugin or other application separately enable this), your choices relating to the management of cookies are applicable only to each separate browser. A cookie cannot control software, and it cannot be used as a medium for viruses or other malware, nor to harm your device or files. A single user cannot be identified solely through the use of cookies or similar technologies.

The cookies and similar technologies we use currently are listed below:

- Google Analytics
- Facebook Pixel

We use Google Analytics and Facebook Pixel on our website in order to analyse, how users use the website.
