

M.A.R.V.E.L. Remote Monitoring equals Peace of Mind

The last thing you want to think about when you are running your food service operation is whether your exhaust system is functioning properly or if there is an issue that arises, when can it be addressed?

What you want is to focus on preparing beautiful dishes for your guests and not have to worry about anything else. That's why Halton's M.A.R.V.E.L. remote monitoring was created. It "worries" about those technical issues so you don't have to and you don't have to lift a finger!

Also Available

Halton's F.O.R.M. Facilities Optimization and Resource Management controls the lighting and equipment within your facility reducing the utilization of gas, water and electricity while improving operational efficiency. A system quietly increasing profitability and sustainability.

With remote monitoring, the system can:

- Troubleshoot remotely without the need for a service company to come to site. Saves time and money!
- Replicate your system via web portal that can be accessed from any browser to view the system in real time.
- Provide the ability for facilities and/or maintenance to view the system online and anticipate upcoming maintenance so it can be scheduled during down time.
- Run energy reports on ventilation activity. A useful tool when evaluating impact on menu or traffic changes correlating to energy use.
- Give live support from an experienced ventilation expert Monday through Friday, 8:00 am to 5:00 pm (CT) Central Time Zone.
- Send automated text or email alerts that can be established for any alarms that are triggered.
 - Filter alarms
 - High temperature
 - Maintenance required
 - Customized alarm notices

Halton, Intelligent Innovation

Halton is a family-owned company specializing in indoor climate and indoor environment products, services, and solutions. Applications range from public and commercial buildings to industry, commercial kitchen, and restaurant applications. Halton is also one of the most recognized names in indoor climate solutions for marine and offshore applications. The company's areas of expertise and product ranges cover air diffusion, air-flow management, fire safety, kitchen ventilation, air purification, and indoor environmental management.

Halton has operations in 31 countries, all over the world. Regional headquarters are located in Finland, the USA, and Malaysia.
