600×300	626	576	326	276
600×400	626	576	426	376
800×400	826	776	426	376

In addition to these standard sizes, other dimensions can be specially ordered.  
The maximum dimensions are 1000×600 mm.

Dimensions for installation holes are (L-10) x (H-10).

# Material

Part	Material	Finishing	Note
Frame	Aluminium	Anodised, mill finished or polyester-painted white (RAL 9003/30% gloss)	Special colours and epoxy-painting (100%) available
Vanes	Aluminium	Anodised, mill finished or polyester-painted/white (RAL 9003/30% gloss)	Special colours and epoxy-painting (100%) available
Opposite frame	Aluminium	–	Accessory

# Accessories

Accessory	Code	Description
Opposite frame	OF	Used in installation depths 25...50 mm

# Function

Air moves to adjoining rooms through the transfer grille due to pressure difference.

The transfer unit does not permit vision from room to room.

## Installation

Halton TVC transfer grilles are screwed (1) either to the wall or door, on both sides (2 x TVC, if required).

If necessary, a rectangular duct can be installed between the grilles.

The Halton TVC transfer grille can also be used together with an opposite frame accessory (OF) to complete transfer unit for 25 to 50 mm thick doors or partition walls. Both the Halton TVC grille and opposite frame are screwed to the wall or door.

For the size of the installation hole, see **Dimensions** (L-10)x(H-10).

## Servicing

Detach the grille for cleaning.

Wipe the grille with a damp cloth instead of immersing in water.

## Specification

The transfer grille consists of a frame with V-shaped vanes and opposite side closure.

The transfer unit is manufactured from profiled aluminium with a white (RAL 9003) colour. The depth of the casing is adjustable (25 to 50mm) according to the thickness of the door or partition

wall.

## Order code

### TVC/W-H; FI-CO-ZT
