

KCT – Counter top ventless hood (UL)

Overview

The KCT type 1 countertop ventless hood is also available as a floor stand mounted hood (Model KCT-F). Ventless technology eliminates the need for venting outside, avoiding costly ductwork and roof or wall penetration, often making these hoods suitable for many non-traditional locations.

- Constructed of durable stainless steel and featuring proven electrostatic air filtration process that exceeds emission requirements of NFPA-96 and ANSI/UL710B, using the EPA-202 test method.
- An optional interlocked appliance power receptacle can minimize on-site electrical installation work. KCT-F receptacle can be mounted on either the right or left side.
- Halton's KCT comes complete with a Complete Filter Set (Double Baffle, EAC, Charcoal), EAC Soak Tank, and Operations Manual.
